Last Progress

Task	To do	In progress	Note	Done
Platform support IoT				
- Add				✅
- Remove		🟥		
- Manage				✅
Mobile app (Android)				
- Control IoT				✅
- User friendly dashboard				✅
- Find phone		🟥	Can not operate through Alexa yet	
Integrate platform				
- Beacon				✅
- Light bulb				✅
- Alexa		🟥	Authentication problem	
Automate				
- Beacon set timer				✅
- Store data on cloud server				✅
- Notification				✅
- Collect data such as sunset/sunrise	🟨			
- Collect user activity				✅
Backend as backbone				
- Control mobile app				✅
Web app				
- Add			Can send information to backend to add to database	✅
- Remove			Click at device box to delete	✅
- Set up		🟥	Need api with list of things we can set	
- Activate			Can enable-disable devices	✅
- Authentication				✅

Last Suggestion

▷ Estimote power
  ■ User input area of the room to set the estimote power
▷ Daily data
  ■ User can see the data of the selected date
▷ User interface
  ■ Improve UI

Problems and Solutions

▷ Alexa authentication
- ■ Cut Alexa out from the system

▷ Sunrise/sunset data
- ■ Get user location to find precise location

▷ Estimote configuration
- ■ User need to access to estimote application to update configuration
